Table 5

Q.3 Doctors wanting to work in the UK are accepted on to the medical register by the GMC in different ways depending on where they first qualified: UK medical students: Every UK medical school must ensure that its students meet the standards set by the GMC before they are awarded a medical degree and become registered. Each medical school assesses its students according to its own curriculum and exams. Doctors from Europe: They have their qualifications and English language skills checked by the GMC before they become registered. European law says the qualifications of European doctors must be accepted automatically. In practice this means that their clinical knowledge, clinical skills and professional behaviour are not assessed by the GMC before they are registered in the UK with a Licence to Practise. Doctors from outside Europe: They must pass a three-part assessment run by the GMC before becoming registered. This assessment tests their English language ability, clinical knowledge, clinical skills and professional behaviour. The assessment is designed to test they are at the same level required for UK doctors who have obtained their medical degree and have passed their first year in work. To what extent do these arrangements make you confident or not confident that appropriate checks are made before all doctors are able to work in the UK?

Base: All respondents who are not a doctor or medical student

Q.3 Doctors wanting to work in the UK are accepted on to the medical register by the GMC in different ways depending on where they first qualified: UK medical students: Every UK medical school must ensure that its students meet the standards set by the GMC before they are awarded a medical degree and become registered. Each medical school assesses its students according to its own curriculum and exams. Doctors from Europe: They have their qualifications and English language skills checked by the GMC before they become registered. European law says the qualifications of European doctors must be accepted automatically. In practice this means that their clinical knowledge, clinical skills and professional behaviour are not assessed by the GMC before they are registered in the UK with a Licence to Practise. Doctors from outside Europe: They must pass a three-part assessment run by the GMC before becoming registered. This assessment tests their English language ability, clinical knowledge, clinical skills and professional behaviour. The assessment is designed to test they are at the same level required for UK doctors who have obtained their medical degree and have passed their first year in work. To what extent do these arrangements make you confident or not confident that appropriate checks are made before all doctors are able to work in the UK?

Base: All respondents who are not a doctor or medical student
