

GMC approved suitable persons

Doctors who don't have a responsible officer can arrange for a [suitable person](#), approved by us, to make a revalidation recommendation about their fitness to practise. This may be arranged on an individual basis, but some doctors have obtained prior approval from us to act as a suitable person for defined groups of doctors.

The following people have been approved by us as suitable persons to make revalidation recommendations for specific groups of doctors. They are only approved for these groups. A suitable person must seek further approval from us if they would like to make recommendations for a doctor, or a group of doctors, who do not fall within their approved cohort.

[See our website for more information about suitable persons.](#)

Name of suitable person	Approved to make recommendations for	Location	Email address
