6. _____

2. How to find the guidance?

Download it through the following URL:

http://www.gmc-uk.org/education/undergraduate/achieving_good_medical_practice.asp

3. Extra Guide: Social media dos and don'ts

Taken from pages 36 & 37

Do:

- Check your privacy settings so you know who can see what on the platforms you use. But remember that social media sites cannot guarantee confidentiality whatever privacy settings you use
- Remember that the apps you use may link to your social media profile and that information from that site may be seen by users of the app
- Maintain boundaries by not engaging with patients or others about a patient's care through your personal social media profiles or platforms. Instead, if appropriate, use a separate professional platform or profile to respond
- Remember that once information is published on social media sites you may not be able to control how it is used by others and it can be difficult to remove it from the internet or the site it was originally posted on
- Use social media to express your views, but don't behave in a derogatory manner to other users and don't post discriminatory content
- Think carefully about how others, particularly patients both present and future, might perceive your content.

Don't:

- Share information about patients or post information that could identify a patient, misrepresent your skills or level of training to others
- Post complaints about your placement providers, medical school, teachers or trainers.
