General Medical Council Health Education Kent Surrey and Sussex Regional Review 2015

Response to the final report following the visit to Surrey and Sussex Healthcare NHS Trust on 14th May 2015

Thank you for the opportunity to respond to the report. SaSH found the visit strengthened the education faculty within the Trust and allowed us to highlight the innovations that members of the education team are embedding for our trainees. We were particularly pleased to see the role of the executive team recognised and also the hard work that has been put into optimising our safety reporting systems. The action points all cover areas that the faculty is already working hard to improve with significant effect.

Education remains at the heart of Trust strategy, both internally and in conjunction with our external partners including the Virginia Mason Institute

Dr Sarah Rafferty

Director of Education

Surrey and Sussex Healthcare NHS Trust
