Warnings on the registrant's registration

Warnings are issued to indicate when a registrant's behaviour or performance is significantly below the standards expected, but when restricting a registrant's practice is not necessary. [See more on warnings.](#)

From 29 Jan 2026 to 29 Jan 2027

On 29 October 2024, Dr Biervliet failed to positively identify Patient 1 and carried out Patient 2's procedure on Patient 1 resulting in her ovaries being removed without consent or clinical indication. This conduct does not meet with the standards required of a doctor. It risks undermining public protection, specifically patient safety, public confidence in the profession and professional standards and conduct and it must not be repeated. The required standards are set out in Good medical practice and associated guidance. In this case, paragraph 81 of Good medical practice is particularly relevant: 81. You must make sure that your conduct justifies patients' trust in you and the public's trust in your profession. Whilst this failing in itself is not so serious as to require any restriction on their registration, it is necessary in response to issue this formal warning. This warning will be published on the medical register in line with our publication and disclosure policy, which can be found at www.gmc-uk.org/disclosurepolicy.

Registration and licensing history (Since 20 October 2005)

From	To	Status
16 Nov 2009	Present	Registered with a licence to practise
20 Oct 2005	16 Nov 2009	Registered

Please note:
