Warnings on the registrant's registration

Warnings are issued to indicate when a registrant's behaviour or performance is significantly below the standards expected, but when restricting a registrant's practice is not necessary. [See more on warnings.](#)

From 17 Jul 2026 to 17 Jul 2027

On 13 January 2022 Dr Dr Malinovski was convicted of driving a motor vehicle after consuming alcohol in excess of the prescribed limit. Dr Malinovski failed to notify the GMC without delay of this conviction, only doing so in August 2025. Dr Malinovski also failed to promptly inform his employer and other workplaces about it. This conduct does not meet with the standards required of a doctor. It risks bringing the profession into disrepute and it must not be repeated. The required standards are set out in Good medical practice and associated guidance. In this case, paragraphs 81 and 99 of Good medical practice are particularly relevant: 81 You must make sure that your conduct justifies your patients' trust in you and the public's trust in your profession. 99 You must tell us without delay if, anywhere in the world: - you have accepted a caution (or equivalent) from a prosecuting authority - you have been charged with a criminal offence in person or by post - you have been found guilty of a criminal offence - you have been criticised by an official inquiry - another professional body has made a finding against your registration as a result of fitness to practise process. Whilst these failings in themselves are not so serious as to require any restriction on his registration, it is necessary in response to issue this formal warning. This warning will be published on the medical register in line with our publication and disclosure policy, which can be found at www.gmc-uk.org/disclosurepolicy.
