Warnings on the registrant's registration

Warnings are issued to indicate when a registrant's behaviour or performance is significantly below the standards expected, but when restricting a registrant's practice is not necessary. [See more on warnings](#).

From 16 Jan 2025 to 16 Jan 2026

On 22 October 2022 Dr Paxton recorded a patient's oxygen saturation and blood pressure in their medical record when you knew you had not checked either. That was dishonest. This conduct does not meet with the standards required of a doctor. It risks bringing the profession into disrepute and it must not be repeated. The required standards are set out in Good medical practice and associated guidance. In this case, paragraph 81 of Good medical practice is particularly relevant: 81. You must make sure that your conduct justifies patients' trust in you and the public's trust in your profession. Whilst this failing in itself is not so serious as to require any restriction on your registration, it is necessary in response to issue this formal warning. This warning will be published on the List of Registered Medical Practitioners (LRMP) in line with our publication and disclosure policy, which can be found at www.gmc-uk.org/disclosurepolicy.
