Warnings on the registrant's registration

Warnings are issued to indicate when a registrant's behaviour or performance is significantly below the standards expected, but when restricting a registrant's practice is not necessary. [See more on warnings.](#)

From 06 Aug 2026 to 06 Aug 2027

On 12 November 2024, Dr Khasawneh provided false information to the GMC in that she completed a medical services statement ('the form') in the name of a third party without their knowledge or consent and provided this to the GMC without explaining that she had completed the form. Dr Khasawneh knew that the form was required to be completed by a person, body or organisation that she had provided medical services for, and she knew that her conduct would give the impression that the third party had completed the form. This was dishonest. This conduct does not meet with the standards required of a doctor. It risks undermining public protection, specifically public confidence in the profession and professional standards and conduct and it must not be repeated. The required standards are set out in Good medical practice and associated guidance. In this case, paragraphs 81 and 89 of Good medical practice is particularly relevant: 81. You must make sure that your conduct justifies patients' trust in you and the public's trust in your profession. 89. You must make sure any information you communicate as a medical professional is accurate, not false or misleading. This means: a. you must take reasonable steps to check the information is accurate b. you must not deliberately leave out relevant information Whilst this failing in itself is not so serious as to require any restriction on Dr Khasawneh's registration, it is necessary in response to issue this formal warning. This warning will be published on the medical register in line with our publication and disclosure policy, which can be found at www.gmc-uk.org/disclosurepolicy.
