Developing the online register
6 Council considered an update on proposals to develop the online register to make it more relevant and useful and to keep it up to date with the functions of the GMC.
7 Council agreed that work should be undertaken to make a number of uncontroversial additions to the register and explore other options that would require legislative change.

8 During the discussion, Council noted that:

a Incremental changes should be made to expand the level of detail held on the register, with the aim of improving its usefulness over time.

b Care would be taken to only include information on the register that could be validated or that registrants could self-declare, with the distinction between the two made clear.

c A report on further options for development of the register would be made to Council later in 2015.

**Update on National Licensing Examination**

9 Council considered an update on work undertaken since September 2014 when it gave approval in principle to explore the possibility of introducing a national licensing examination for all doctors applying to hold a licence to practise in the UK.

10 During the discussion, Council noted:

a That there was an aspiration to have an assessment process for all doctors wishing to practise medicine in the UK and work would continue in seeking to reach this position.

b The importance of ensuring there was clarity of the purpose of the national licensing examination and that this was clearly communicated.

c Legal advice would be taken on all aspects of the proposals as they were developed.

d That the detail on issues such as possible formats and timing of the examination, the curriculum and the maximum number of allowed attempts would be considered as part of the blueprint for development after the framework of a proposed model had been agreed.

e That a business case, including some financial analysis, would be brought to Council as part of consideration of approval to move to Phase 2 of the project at its next meeting on 2 June 2015.
