The two tables show those areas of competences that have been accepted and those that need further input from the doctor.

The Area of Competences that have been accepted cannot be updated by the doctor.
Not Accepted Area Of Competence

CiP 1 - Demonstrate the professional values and behaviours expected of all doctors as outlined in Good medical practice.

Document upload section

Find out more about what evidence is required for your specialty (opens in a new window) - you should have a copy of the most recent specialty specific guidance open whilst you complete your application.

You should upload all documents for this section below. If some of your evidence is relevant to more than one section of the application, you don't need to upload it twice. You should clearly cross reference evidence relevant to more than one section in the Description of Evidence section of the application.

We've produced specific guidance on the way evidence needs to be uploaded in your application - you can find this on our website. You **must** follow this guidance in order for your evidence to be accepted. **Guidance which does not meet our requirements may be removed from your application.**

Please note that all uploaded documents will be stored in a read only format. Once you have uploaded a document it won't be possible to update it unless you remove the whole document and re-upload it.

Summary of what I need to show
- Participation in other meetings involving direct patient care (minutes etc.)

- Participation in developing guidelines, standard operating procedures etc. (the guideline, SOP and pathway to its design or review)

Description of evidence

Find out more about what evidence is required for your specialty (opens in a new window) - you should have a copy of the most recent specialty specific guidance open whilst you complete your application.

You can see the comments provided by your adviser on the evidence you submitted below. You should provide a brief summary of all additional evidence you are providing for this section in the 'Your additional comments for this section' box.

Once you are satisfied you've completed this section click 'Save'.

Summary of what I need to show

CiP descriptors:

- Make the care of and effective communication with patients their first concern
- Maintain a high standard of professional performance
- Act in the best interest of patients
- Be accountable for professional performance
- Continuously develop and maintain professional standards

CiP 9 - Appropriately manage imaging examination lists/procedures according to clinical need and professional expertise.

CiP 10 - Evaluate image quality and utilise the knowledge of imaging sciences to optimise image quality.

CiP 11 - Safely manage the imaging and image-guided intervention needed to support emergency care.

CiP 12 - Effectively contribute a clinical/imaging opinion to a multidisciplinary (MDT) meeting.

Verification of your evidence

Select to confirm that you have reviewed the adviser’s comments and are satisfied that you have provided all additional information and evidence you intend to at this stage.*

Tick to confirm evidence is complete then select Submit.
Thank you for submitting evidence and information to support your application. Your specialist applications adviser will review this and be in touch shortly to discuss the progress of your application. If you have confirmed that you will also be providing hard copy evidence, we will wait to receive this before your adviser contacts you.

If you have any queries whilst you await our guidance, please contact your adviser on equivalence@gmc-uk.org.
