National training survey briefing note 2

Data collection in 2016

This briefing note contains the key dates for the 2016 national training surveys, and sets out the survey data that LETBs and deaneries will need to provide.

Following an autumn 2014 pilot of the trainer survey we will be launching a national trainer survey for 2016 that will run concurrently with the established national trainee survey. The 2016 survey timeline for both national training surveys and key submission deadlines will be aligned.

The 2016 survey census date will be 22 March, with both the trainee and trainer surveys live from then until 4 May.

We would encourage you to review your location data (available to view via GMC Connect) and provide information on any missing sites, duplicate sites or an intention to merge LETB/deanery programmes as soon as possible to ensure the approval status of your programmes are up to date before the data submission deadline. Should sites remain unapproved, the potential risk to doctors in training is that they will not be eligible to apply to the specialist register via the CCT route.

LETBs/deaneries will need to ensure they follow our approvals process for any changes to their programme and location reference data for 2016. You can find information about the approvals process at [http://www.gmc-uk.org/education/approval_post_and_programme.asp](http://www.gmc-uk.org/education/approval_post_and_programme.asp).

Key differences from 2015

- **Trainer data validation**

  LETBs/deaneries will be required to submit information on all doctors working in an approved training capacity within a separate trainer validation tool. This will be made available at the same time as the trainee data validation tool.

- **November release of the data validation tools**

  The trainee and trainer data validation tools will be made available to all LETBs/deaneries in November to facilitate early preparation of the NTS data and in recognition of the increase in resource required to submit both the trainee and trainer data for 2016.
### Timeline

These are the key dates for submitting trainee and trainer data for the 2016 national training surveys:

<table>
<thead>
<tr>
<th>Year</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>2015</td>
<td><strong>From November 2015</strong>&lt;br&gt;LETBs/deaneries should review <strong>all</strong> of their programme and location data, and submit any updates to the GMC approvals team using GMC Connect. Queries can be sent to <a href="mailto:quality@gmc-uk.org">quality@gmc-uk.org</a>.</td>
</tr>
<tr>
<td></td>
<td><strong>November 2015</strong>&lt;br&gt;GMC sends the trainee data validation tool and the trainer data validation tool and pre-approved programme reference data to LETBs/deaneries via GMC Connect.</td>
</tr>
<tr>
<td></td>
<td><strong>From November 2015</strong>&lt;br&gt;(until 3 March 2016)&lt;br&gt;LETBs/deaneries collate trainee and trainer survey data and load it into the relevant data validation tools. Data queries can be sent to <a href="mailto:nts@gmc-uk.org">nts@gmc-uk.org</a>.</td>
</tr>
<tr>
<td>2016</td>
<td><strong>3 March 2016</strong>&lt;br&gt;Deadline for LETBs/deaneries to submit valid trainee and trainer data to GMC.</td>
</tr>
<tr>
<td></td>
<td><strong>From 3 March 2016</strong>&lt;br&gt;(until 21 March 2016)&lt;br&gt;GMC carries out pre-survey validation on trainee and trainer data, and liaises with LETBs/deaneries regarding queries. GMC loads data into survey.</td>
</tr>
<tr>
<td></td>
<td><strong>Tues 22 March 2016</strong>&lt;br&gt;to**&lt;br&gt;<strong>Wed 4 May 2016</strong>&lt;br&gt;Survey live (six weeks).&lt;br&gt;LETBs/deaneries to validate doctor data change requests via survey management tool.</td>
</tr>
<tr>
<td></td>
<td><strong>May 2016</strong>&lt;br&gt;GMC carries out a repeat of the pre-survey validation checks on the trainee and trainer data and liaises with LETBs/deaneries regarding queries. Draft survey reporting tool made available to the LETBs/deaneries for review and sense-checking against underlying trainee, programme and location data.</td>
</tr>
<tr>
<td></td>
<td><strong>From June 2016</strong>&lt;br&gt;Survey reports made available to the public.&lt;br&gt;Final date to be confirmed.</td>
</tr>
</tbody>
</table>
Census date

The census date for the 2016 survey is Tuesday 22 March 2016.

Trainee population

The trainee population we will be surveying and will require complete training information on is:

- Foundation trainees (F1 and F2 trainees on a foundation programme)
- Core trainees
- Higher specialty training, including specialty registrar (SpR) and GP trainees
- Fixed term specialty training appointment (FTSTA) trainees (we will need to know the level associated with the trainee’s current role)
- Locum appointment for training (LAT) trainees (we will need to know the level associated with the trainee’s current role)
- Military trainees – all military trainees working within the service on all approved programmes
- Trainees in clinical lecturer and academic clinical fellowship posts approved by the GMC (we will need to know the level associated with the trainee’s current role)
- Trainees working for non-NHS organisations. For example, occupational medicine, pharmaceutical medicine and public health medicine
- Trainees on out of programme training on approved UK training programmes at another deanery/LETB (OOPT-UK)
- Post-CCT trainees on sub-specialty training
- F2 trainees completing additional General Practice training

The trainee populations we will not be surveying, but will collect information about are:

- Trainees on maternity or paternity leave on the census date
- Out of programme trainees: out of programme training (OOPT) outside of the UK, out of programme research (OOPR), out of programme clinical experience (OOPE), or out of programme career break (OOPC) on the census date

The data fields required for these trainees are indicated by an asterisk ‘*’ in the trainee data variable table on page 7.

The trainee population we will not be surveying and will not require information on is as follows:

- Dentists
- Doctors who have been awarded their CCT, and are in their grace period (and not continuing with sub-specialty training)
- Non-medical public health trainees (we will survey these trainees separately and collect their information from the Faculty of Public Health)
- Doctors who are NOT in training posts eg locum appointment for service (LAS) and trust grade doctors
- Medical training initiative (MTI) trainees
Trainee population: additional information

Multi-site working
In data submissions from previous years, there were inconsistencies in how LETBs/deaneries provided location data for trainees at multi-site and single-site trusts. In order to avoid this for the 2016 survey, and to improve the usefulness of the reporting tool for these providers and sites, we have introduced the following guidelines:

- For multi-site trusts, if the trainee is based predominantly at one site, please enter this as their site.
- If the trainee’s time is split equally between sites, please indicate that this trainee is multi-site by selecting ‘yes’ in the ‘Multisite trainee’ column.
- For all single site trusts, please provide the site as well as the trust.

Academic trainees
Academic trainees who have completed or are completing the academic component of their training should be presented with the academic questionnaire in the survey. Which trainees are routed to the academic questionnaire depends on a) your data submission and b) the trainee’s answer to the routing questions in the survey.

Trainees who are only currently completing their academic component should have the Post Specialty “Academic”. These trainees will not answer the main survey questions or be included in any indicator calculations. For trainees who are doing a purely clinical post on the survey census date, their Post Specialty should not be “Academic” but instead it should be the relevant clinical post specialty.

If a trainee’s post on the survey census date is split between clinical and academic time, the trainee’s post specialty should reflect the clinical element of their post (which will mean that they are presented with the main survey). These trainees will have the opportunity to complete the academic questionnaire too, by self-identifying themselves as completing academic research time through a dedicated routing in the survey.

Run-through training (RTT) exception trainees
From 2008 the majority of surgical, psychiatry and medical specialties were uncoupled into separate core and higher programmes. Prior to 2008 RTT exception trainees were appointed on a run-through basis to training programmes that have since been uncoupled into separate core and higher programmes.

Where these run-through trainees are still at core level, their trainee type should be ‘RTT Exception’. Additionally data validation rules require their training level to be recorded at a Core Training (CT) grade, despite their actual grade being an Specialty Training (ST) grade.

Where an RTT exception trainee has been assigned a core programme DRN while they complete the core stage of training, please ignore the data validation warning saying that the NTN/DRN specialty does not match the programme specialty.

Please note several uncoupled programmes were reintroduced as run-through programmes in 2013, for example cardio-thoracic surgery. Trainees appointed in 2013 on a run-through basis to programmes that are also offered as uncoupled training programmes should NOT be marked as RTT exception trainees and their trainee data should be entered as normal. This is so that
we are able to differentiate them from pre-
2007 run-through appointments.

**OOPT UK-based trainees**

Trainees that are currently taking time out of
their own training programme to do a post in
another established training programme in
the UK, managed by a different
LETB/deanery, should be identified as ‘OOPT
UK-based’ within the trainee type field. The
host LETB/deanery should submit full data
records for these trainees. The home
LETB/deanery should submit a trainee’s
name, UID and programme data. We need to
identify the home LETB/deanery of any OOPT
UK-based trainees so that they can be
reported against this organisation in any
LETB/deanery reports.

**Military trainees**

Indirectly managed military trainees should
be included within their host LETBs/deaneries
data submission. In February we will send
each LETB/deanery a list of the military
trainees that we anticipate they will be
submitting information for. Any trainees
within that list that are not known to the
LETB/deanery should be highlighted to us at
the time of data submission.

**F2 trainees completing additional
General Practice training**

There are two trainee types within this
category.

The first are trainees who may have passed
F2 but have unsuccessfully applied to general
practice and are now undergoing additional
general practice training. These trainees
should be given the trainee type of ‘PSTGP’
(pre specialty training GP).

The second type are trainees who have
applied to general practice who cannot
demonstrate F2 competencies and are now
undergoing preparatory GP training. These
trainees should be given the trainee type of
‘F2GP’.

Both of these trainee types should be
recorded at F2 and against the Foundation
programme.

**Trainer population**

Any doctor that will be holding a recognised
trainer role on 22 March should be included
within the trainer data validation tool. Trainer
roles will be identified as either ‘clinical
supervisor’, ‘educational supervisor’ or ‘both’.

Our definitions of clinical and educational
supervisors are the same as those given in
the GMC’s recognition and approval of trainer
framework.

A named **clinical supervisor** is a
trainer who is responsible for
overseeing a specified trainee’s
clinical work throughout a placement
in a clinical or medical environment
and is appropriately trained to do so.
He or she will provide constructive
feedback during that placement. He
or she will lead on providing a review
of the trainee’s clinical or medical
practice throughout the placement
that will contribute to the educational
supervisor’s report on whether the
trainee should progress to the next
stage of their training.

A named **educational supervisor** is
a trainer who is selected and
appropriately trained to be
responsible for the overall supervision
and management of a trainee’s
trajectory of learning and educational
progress during a placement or series
of placements. Every trainee must
have a named educational supervisor.
The educational supervisor helps the
trainee to plan their training and
achieve agreed learning outcomes. He
or she is responsible for the
educational agreement and for
bringing together all relevant evidence
to form a summative judgement at
the end of the placement or series of
placements.

The data fields required for the trainer
population are outlined in the trainer data
variable table on page 14.

Providing the data to the GMC for
the 2016 national training
surveys

We will send LETBs/deaneries updated
trainee and trainer data validation tools with
user instructions in November 2015. You will
be able to use the tools to validate the
trainee and trainer data locally and ensure
your deanery systems have accurate
information. The deadline for data
submissions is **3 March 2016**. Please work
to address any validation errors so you are
able to send us only validated data by this
deadline.

If you have any queries about data
validation, please contact us at any time at
nts@gmc-uk.org.

GMC pre-survey validation

We will use the period between 3 March and
21 March to carry out further data checks.
Data checks that apply to the trainee data
sets only are indicated by an asterisk ‘*’ in
the list below.

We will check:

- **Training level or grade***
  That a trainee’s training level or grade
  follows a logical progression when
  compared with data from previous
  years.

- **NTN and DRN specialty***
  That a trainee’s NTN/DRN specialty
  matches the programme specialty
  submitted.

- **Site locations are matched to only one LEP***
  This is required for reporting
  purposes. Where this is not the case,
  we will contact LETBs/deaneries for
  clarification.

- **Post-CCT doctors in their grace period***
  That any doctors included in
  LETB/deanery data submissions
  have not already been awarded their CCT.
  This is done by checking the
  registration status of the doctor on
  the medical register. Where a CCT has
  been awarded the doctor will be
  excluded from the survey, unless the
  doctor has been identified as
  occupying a post-CCT sub-specialty
  training post. In the latter scenario
  the doctor will still be included in the
  survey.

- **Consistently recording to site level across LETBs/deaneries***
  Where an LEP hosts trainees from
  more than one LETB/deanery, we will
  check that data submissions record
  locations consistently. Where this is
  not the case (for example if one LETB
  only records trainees’ location at
  trust-level but another LETB records
  trainees at site level), there is a risk
  that survey results are not reported
  effectively.

- **Duplicate records across LETB/deaneries***
  Where a record for a doctor has been
  submitted by more than one
  LETB/deanery we will feedback to
  both organisations for resolution.
We will need to liaise with LETB/deanery data teams to resolve queries about your data submission during this period.

**Data security**

When you have populated the data validation tools with validated trainee and trainer data you must send them to us using the GMC Connect system. You **must not** send them by email as they must be transferred using a secure channel. We will send you instructions on how to use the GMC Connect system.

Once your data has been submitted to the GMC you will be able to amend it using the survey management tool in GMC Connect.

**Contact**

If you have any queries then please email NTS@gmc-uk.org or call Jonathan Hawkes on 0161 250 6949.

</thead>
<tbody>
<tr>
<td>GMC number*</td>
<td>Mandatory</td>
<td>Must be a 7 digit number, e.g. '1234567'</td>
<td>This will be validated against our list of registered medical practitioners.</td>
</tr>
<tr>
<td>First name*</td>
<td>Mandatory</td>
<td>Free text</td>
<td></td>
</tr>
<tr>
<td>Surname*</td>
<td>Mandatory</td>
<td>Free text, must match doctor’s name on GMC Register</td>
<td>This will be validated against the list of registered medical practitioners.</td>
</tr>
<tr>
<td>1st programme approval code*</td>
<td>Mandatory</td>
<td>Must be 3 letter GMC deanery code followed by either 3 or 4 numbers: e.g. 'LON123'</td>
<td>This will be validated against your pre-approved reference data. If a trainee is participating in more than one programme you must decide which one to report on. You can only choose one value.</td>
</tr>
<tr>
<td>1st programme specialty*</td>
<td>Mandatory</td>
<td>Free text, must match 1st programme approval code</td>
<td>This will be validated against your pre-approved reference data and therefore must be the correct specialty for the programme code provided.</td>
</tr>
<tr>
<td>2nd programme approval code (where applicable)</td>
<td>Mandatory where applicable</td>
<td>Must be 3 letter GMC deanery code followed by either 3 or 4 numbers: e.g. 'LON4567'</td>
<td>This will be validated against your pre-approved reference data. Collecting this data will enable us to identify the number of doctors on dual CCTs and what specialties they are training in. The survey will not ask any questions on this specialty.</td>

</tbody>
</table>

A warning will be given if no value is provided (please ignore this for foundation trainees). Collection of this field will help to resolve any queries regarding the doctor's training programme and assist us with identifying academic trainees. The NTN/DRN specialty will also be validated against the programme specialty submitted for a trainee.

| **Management deanery/LETB** | Mandatory for London shared services | *(all deanery/LETB values listed)* |
| Multisite trainee | Mandatory where applicable | Yes or No | Where a trainee cannot be identified as having a primary site location because they spend an equal amount of time across various sites it should be indicated here that they are a multisite trainee. |

**For doctors not in training, we only require the fields highlighted with an "*"**

Please note that we are not collecting the doctor’s email address from LETBs/deaneries as we will use the email address that we hold against the doctor’s GMC online account. However, you may still wish to collect the email address as part of your data collection process; there will be a separate column provided for this data in the data validation tool.
